

Essentielle range:
EuroCave technology
at your service!

EuroCave[®]

V266: All the essentials of a wine cellar!

EuroCave V266: Optimum capacity, modest lines and proven efficiency... the essential product for preserving your wine!

Developed to allow wine enthusiasts to conserve a large number of bottles, the V266 cabinet benefits from all of EuroCave's expertise.

Equipment:
3 storage shelves
1 sliding shelf

Optimum capacity

With 3 storage shelves and one sliding shelf, the V266 wine cabinet has the capacity to hold 215* bottles! As with all EuroCave cabinets, its layout can be adapted to suit your convenience; all shelves in the Classic range may be used in it.

A line that combines modesty and practicality

Because of its clean lines and discreet colour scheme, the V266 cabinet adapts to all situations and layouts. Fitted with a solid reversible door, it would fit in ideally in a wine cellar or a garage. With its proven technology and timeless appearance, the V266 wine cabinet is the ideal substitute cellar for wine lovers!

A temperature control system that is efficient, reliable and user-friendly. Fitted with an accessible and easy to use electronic control panel, the V266 cabinet allows you to see and very easily programme the temperature of your wine cabinet.

Accessible excellence, an accumulation of expertise. Enter the world of the inventor of wine cabinets and gain access to over 30 years of technological innovations brought about by the world leader in wine cabinets!

Over 50 models of wine cabinets ranging from 50 to 500 bottles in capacity – request the complete wine cabinet catalogue from your EuroCave distributor.

Undeniable technological excellence with the EuroCave label

An exclusive EuroCave innovation, the "twin process" thermal regulation system (hot/cold double circuit) allows the specific climate of the best natural cellars to be recreated.

Combined with the significant thickness of the walls (5cm), the "CQI" high density insulator ensures optimal protection against temperature variations. A double thermal barrier – essential for protecting your wine.

Because vibrations adversely affect the biochemical process that wine undergoes, the EuroCave original "VES" system ensures a highly effective barrier against vibration.

In order to ensure optimal air quality and its constant renewal, each EuroCave cabinet benefits from natural ventilation by "breather effect".

The dimensions of EuroCave wine cabinets were designed specifically for wine and allow easy access and storage.

Technical data sheets are available from your EuroCave distributor.

Technical Specifications

Ref.	Dimensions			Weight when empty	Capacity	Temperature range (C°)		Consumption over 24h**
	Height	Width	Depth			Minimum T°	Maximum T°	
V266	1744 mm	654 mm	689 mm	71 kg	215 bottles	0°C	35°C	0,9

* Capacities are given as an indicator, with Bordeaux shape bottles. ** Consumption over 24hrs measured with an external temperature of 25°C and a solid door.
