

## BORDEX WINE RACKING

### Height & Width of Wine Racking (mm)

To calculate the capacity of your custom rack, find the measurements closest to the width and height of your space in the chart below. Multiply the pocket numbers that correspond to your height by width.

For example, if space is 2000mm high x 3000mm wide, rack size would be:  
1940mm (20 pockets) x 2985mm (31 pockets), so total capacity is 620 bottles.

#### WINE BOTTLES

Pocket Depth = 235mm

#### MAGNUMS

Pocket Depth = 300mm
